

I am very concerned about the possible revocation of the laws which prohibit cross-ownership of newspaper, TV and cable by the same company within a specific geographic area. Allowing for media monopolies within communities will restrict individuals' access to unbiased reporting. Every community needs access to news from a variety of sources in order to ensure that all sides of issues/opinions are addressed. The media is a very powerful tool for shaping people's opinions. We need to ensure that the attitudes of a few, are not the only voices that a community hears.
